Product Overview: All-in-one seat comfort solution

Car seat cover: Comfort all year round, personalized customization

Available in various materials including linen, ice silk, and leather to meet seasonal needs. Multiple color options enhance the vehicle's sophistication and comfort.

Headrest and lumbar support set: Scientific support to relieve fatigue

Crafted with memory foam and cloud-sensing cotton cores, it features slow-rebound technology that conforms to your body's contours. The 360-degree wrap design provides precise support for both cervical and lumbar spine, making it ideal for daily commutes and long-distance driving.

Car steering wheel cover: Slip-resistant and comfortable to touch

The vehicle features multiple materials and stitching techniques, including leather and YOGA-Air fabric, for a comfortable grip. It supports customized solutions for dedicated vehicles, with easy installation to enhance driving control and safety.

Car mat: comprehensive protection, easy to clean and durable

Covering the foot area inside the car, effectively preventing stains and dust, and protecting the original carpet. The material is wear-resistant and easy to clean. There are many styles and colors to choose from, suitable for different models, and keep the interior clean.

User-friendly operation; robust and secure fit

01

*Backrest and lumbar support set:
Snap-on installation, 1-minute setup*

The headrest features an embedded snap-fit design, allowing easy installation by simply pressing around the original seat headrest rod. The adjustable strap accommodates various vehicle models. The lumbar support is securely fastened to the seat's center seam using a built-in snap-fit mechanism, requiring no tools and enabling quick installation by a single person. It remains firmly in place even during sudden braking or sharp turns.

Wheel cover: fits and doesn't slip
1-minute quick installation

02

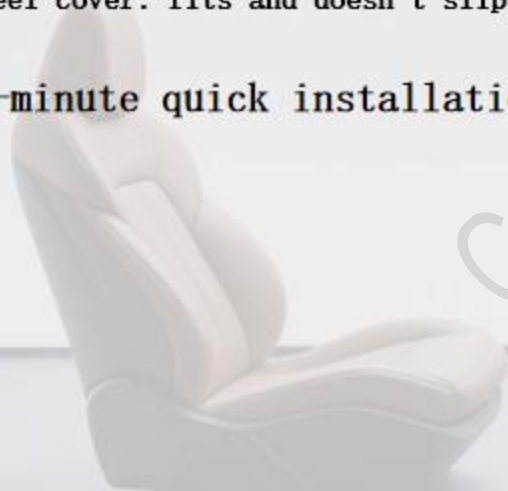

*Car seat cover: Elastic
wrapping, suitable for all
models*

The elastic sleeve edge design is inserted from the bottom of the seat upward and fixed by the seat structure itself, without the need for additional straps. The universal size can be adapted to more than 99% of the five-seater models on the market, and the installation does not affect the seat adjustment and airbag deployment.

04

Car mat: Snap fastening for precise fit

The universal design features anti-slip rubber material to prevent the foot mat from slipping during use. Simply place it in the car for installation. It supports cutting.

Core advantages: three-dimensional support to relieve fatigue

Ergonomic design for precise curve fit

The spine protector is designed to fit the body's acupoints. For example, the "dragon spine line" protrusion of the waist support precisely supports the concave position of the lumbar spine, and the "mountain" structure of the head pillow is slightly higher on both sides, which can be just locked into the neck, achieving a full range of support from the head to the waist.

Premium materials for strong and comfortable support

Crafted with eco-friendly materials like cloud-sensitive cotton cores, memory foam, and slow-rebound technology, this headrest-waistrest set delivers firm yet shape-stable support while evenly distributing pressure. The 8H model offers plush yet firm comfort, absorbing driving shocks to deliver a snug, enveloping support that keeps you comfortable during extended sitting.

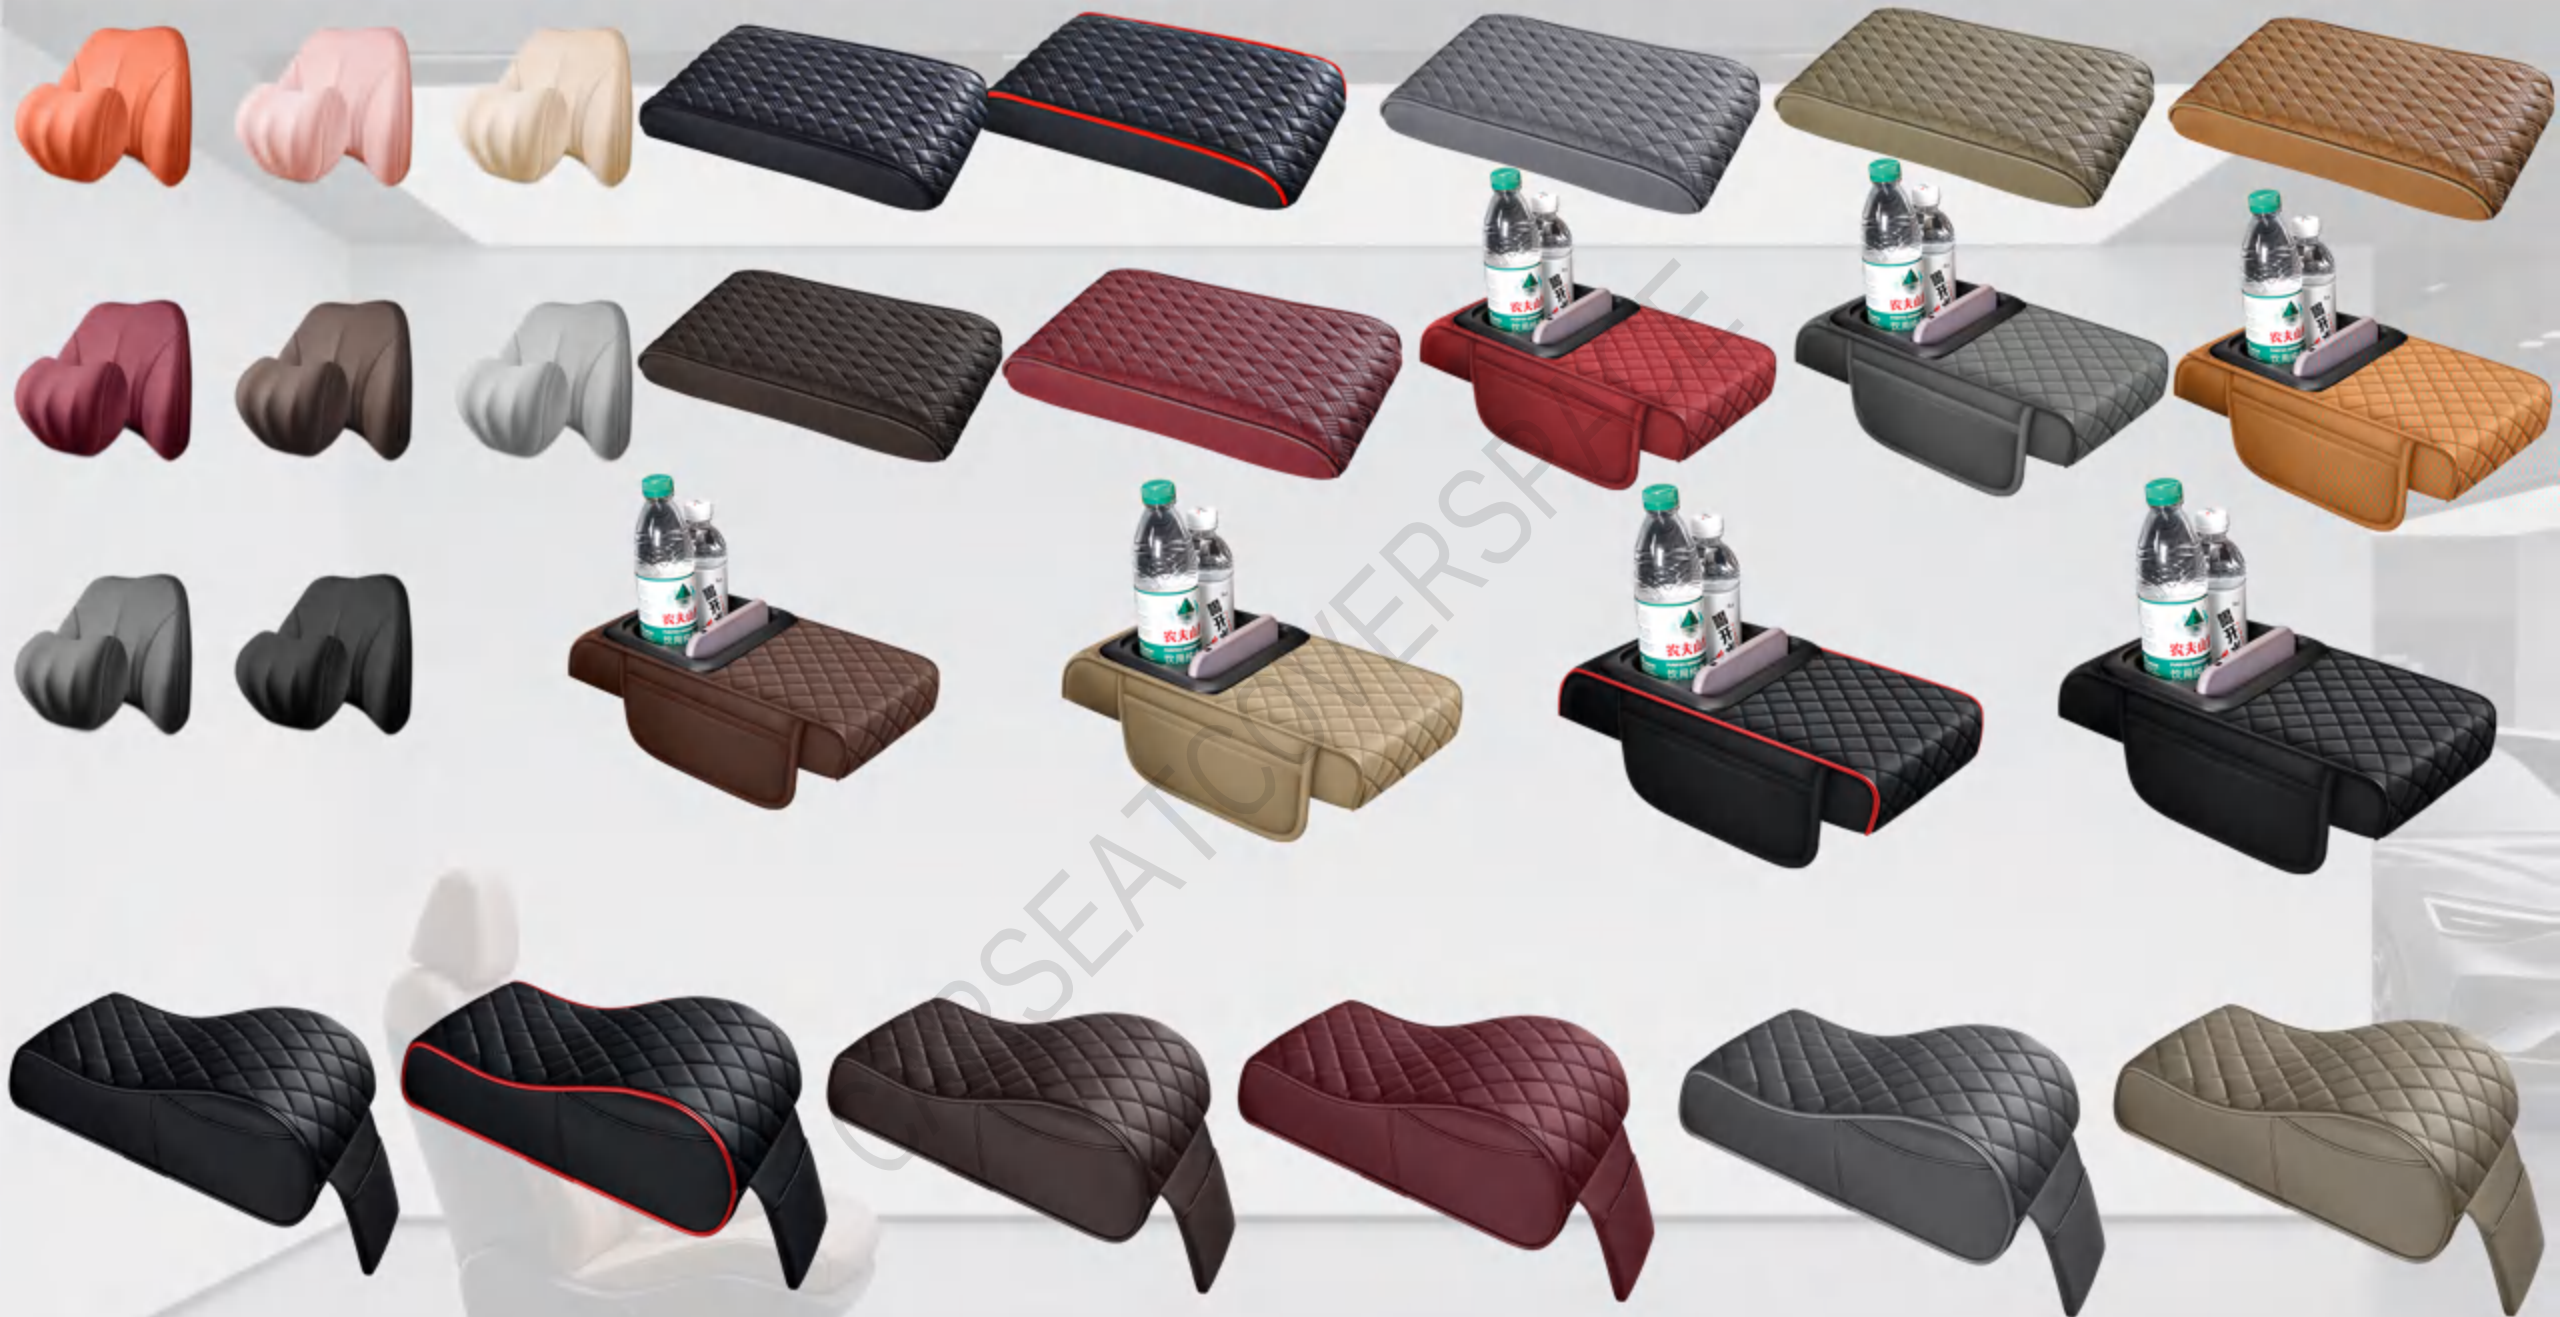

Multi-dimensional support structure improves driving experience

The headrest and lumbar support set features a 3D surround and 360-degree wrap design. The lumbar support, designed with a 'bionic wing' that automatically adjusts to maintain posture during body movement. User tests show it significantly reduces fatigue during long drives, making long hours in traffic or other sedentary situations much more comfortable.
